# Climate Change

Climate change is a major threat to biodiversity. Remember that \_\_\_\_\_Animal\_\_\_\_\_are adapted to their environments and have specific tolerance ranges to temperature and other abiotic conditions. If conditions change beyond an organism's tolerance, the organism must move to a more suitable \_\_\_\_\_Location\_\_\_\_\_or face extinction. Species in fragmented habitats are particularly vulnerable to climate change \_\_\_\_\_Noun\_\_\_\_\_if conditions change they may not be able \_\_\_\_\_Number\_\_\_\_\_move easily to a suitable habitat.
