Luis Medina, Venisia Santiago

exists on _____^{Number} levels; _____^{Noun} diversity, _____^{Noun} diversity, and genetic diversity.

_____^{Noun} diversity refers to the variety of habitats, communities, and _____^{Noun} processes in the

biosphere. The number of different species in the biosphere, or in a _____^{Adjective} area, is called

_____^{Noun} diversity. To date, biologists have identified and named more than 1.8 million species, and the

estimate that at least 30 million more are yet to be discovered. Much of this diversity exists among

_____^{Adjective} organisms. But _____^{Adjective} species of _____^{Plural noun} like the snake in Figure 6-13,

are still being found.
