3. Past Tense Verb
4. Verb
5. Noun

Sami Ali and Ana Kirkland

Wild species are the original source of many medicines, including penicillin like aspirin and antibiotics like penicillin. The Plural noun in wild species are used to treat diseases like depression and cancer. For example, the foxglove, shown in FIGURE 6-14, contains Noun called digitalins that are Past tense verb to Verb heart disease. These plant compounds are assembled according to instructions coded in genes. So the genetic information carried by diverse species is like a "natural Noun"; from which we have a great deal to learn.
