# DSi

The new DSi has probably \_\_\_\_\_different functions. The camera, the sound tweaker, picto chat, the DSi shop, and the game that's in you slot.

## The Camera

The camara has about \_\_\_\_\_different lens which are all really \_\_\_\_\_. I like the Distortion Lens that makes you \_\_\_\_\_look \_\_\_\_\_. You can also make frame or use the \_\_\_\_\_ones on the DSi.

## The Sound Tweaker

With the sound tweaker you can make your voice go \_\_\_\_\_ Adverb or \_\_\_\_\_ Adverb after you record your voice. You obviously speak with your \_\_\_\_\_ Body part into the \_\_\_\_\_ Noun.

## Picto Chat

With picto chat you can doodle and write to people. You may want to try and draw a \_\_\_\_\_ Noun. Or write to someone you know and remind them about something.

Those are 3 of the Same number as the first number you used things you can do on a DSi!
