Childbirth

1.	Animal
2.	Part Of Body
3.	Different Part Of Body
4.	Noun

Childbirth

Childbirth is th	ne culmination of a h	uman pregnanc	cy or gestation pe	riod with the delive	ry of a newborn		
Animal	_from the mother's _	Part of body	The process	of human childbirth	n is categorized in 3 stages		
of labor. In the	e first stage, the	part of body t	pegins rhythmic c	ontractions which s	teadily increase in strength		
and frequency, gradually widening and thinning the During the second stage, the							
animal	_passes from the	part of body	_ through the	different part of body	and birth canal. In the		
third stage, the placenta pulls from theand is expelled through the birth canal.							
In most cultures, childbirth is considered to be the beginning of a person's life, and their age is defined relative to							
it. Some famili	les view the	as a spec	cial part of birth,	since it has been the	e child's life support for so		
many months.	Some parents like to	see and touch	the <u>noun</u>	<u>.</u> .
