The Human Brain

The structure of the human brain differs from that ofanimals in several important ways. These
differences allow for many abilities over and above those of other animals, such as
skills. Human encephalization is especially pronounced in the neocortex, the most
complex part of the cerebral
Humans have unique neural but much of their brain structure is similar to that of other
mammals. Basic systems that alert the nervous system to stimulus, that sensein the
and monitor the condition of the body are similar to those of even vertebrates.
The neural circuitry underlying human consciousness includes both theandand
prototypical structures of the brainstem. The human brain also has a massive number ofAdjective
Plural noun allowing for a great deal of Adjective Verb ending in ing.
