Water Droplet

Hello, my name is "George Kinsworth,"; and I am a water droplet. One day I was _____Verb ending in ing with my friend _____First name when all of a sudden I felt really warm. I then realized I was being evaporated. I hate EVAPORATION because I feel all woozy. I then realized I was in the CONDENSATION part of the HYDROLOGICAL CYCLE. I met someone named _____First name; and she was a _____Adjective _____Adjective droplet. She was very talented, and _____Adjective. She has been to many _____Adjective places such as: a TRIBUTARY, a marsh, a SATURATED ZONE, a PERMEABLE LAYER, oceans, lakes, and rivers. I have been in oceans, lakes, and rivers, but never the rest. We found some things we have in common, we both hate WATER POLLUTION, and we both love WATER CONSERVATION. Some places we both wanted to visit were: an AQUIFER, RESERVOIR, WETLAND, and RUNOFF. We thought they would be _____Adjective. We then realized that we were precipitating as _____Type of precipitation into a reservoir! Finally! We both got to go somewhere we've longed to go! It was _____Adjective. We had such a _____Adjective journey. It wasn't over yet, though. Later, we had _____Number _____Adjective children and we lived happily ever after.
